

Lightweight VHF/UHF Dipole Manpack Antenna WD2245RQ

The WD2245RQ is a very lightweight wideband dipole antenna that does not require a ground plane for proper operation in the 225 – 512 MHz frequency range. Its ideal performance in the 225 – 400 MHz NATO band makes it very well suited for use with modern SDRs, providing an effective coverage for a range of voice and data communications including Have Quick II and SATURN.

- Lightweight and slim antenna design
- Rubber spring absorbs shocks and attenuates oscillation
- Effective coverage of the complete 225 – 512 MHz frequency range
- No ground plane required
